Introduction

The Indian Institute of Metals, Hyderabad chapter is organizing a short course on “Metallurgy for Non-Metallurgists” (MNM-2016) during 14 - 15, July 2016 to disseminate knowledge on Metallurgical and Materials Engineering to working professionals and students who would like to make Metallurgical Engineering as their profession. This program will cover topics like metal production, alloy preparation, deformation processing, strengthening mechanisms, heat treatment, materials testing, physical/mechanical properties with examples from a variety of industrially important metals including special metals, superalloys, nuclear materials etc.. The participants are expected to get benefitted by acquiring knowledge and skills to independently assess possible metallurgical and design solutions, to recognize and understand crucial metallurgical phenomena and intelligently discuss their metals related problems with design engineers, manufacturing engineers and metallurgists.

Topics to be Covered

- Introduction and History of Metallurgy and Materials Engineering
- Materials’ Selection and Design
- Melting and Casting
- Metal Working
- Heat Treatment
- Characterization of Materials
- Mechanical Testing
- Non Destructive Testing
- Metal Joining Techniques
- Surface Engineering
- Extractive Metallurgy
- Opportunities in Metallurgy and Materials Technology
